

	Pole configuration	Complex plane	Free response
Stable	Overdamped $p_1 < p_2 < 0$ Monotonic decay		
	Critically damped $p_1 = p_2 < 0$ Fastest nonoscillatory decay		
	Underdamped $p_{1,2} = \sigma \pm i\omega, \sigma < 0$ Decaying oscillation		
Critically stable	Undamped $p_{1,2} = \pm i\omega$ Sustained oscillation		
Unstable	Oscillatory unstable $p_{1,2} = \sigma \pm i\omega, \sigma > 0$ Growing oscillation		
	Repeated-real unstable $p_1 = p_2 > 0$ Monotonic growth		
	Distinct-real unstable $p_1 > p_2 > 0$ Monotonic growth
